

Electro-thermal outdoor measurements including temperature for photovoltaic modules

Thesis Subtitle

Sideridis Paschalis

A thesis submitted in fulfillment of the requirements for the
degree of Diploma in Engineering in the Department of
Electronics & Computer Engineering School of Electrical &
Computer Engineering

Electrical & Computer Engineering
Aristotle University of Thessaloniki
Greece
September 2016

Contents

1	Introduction	2
1.1	PV in general	2
1.2	Important aspects	2
1.3	Thesis structure	2
2	System Description	3
2.1	3
3	Measurement PCB	4
3.1	4
4	Control and Data	5
4.1	5
5	Final Device	6
5.1	6
6	Appendix	7
6.1	7

Chapter 1

Introduction

1.1 PV in general

General information about PV modules and the solar energy market

1.2 Important aspects

Which things are important and why we want to measure them?

1.3 Thesis structure

How is the document structured. Brief description of each section

Chapter 2

System Description

2.1 ...

Chapter 3

Measurement PCB

3.1 ...

Chapter 4

Control and Data

4.1 ...

Chapter 5

Final Device

5.1 ...

Chapter 6

Appendix

6.1 ...

List of Algorithms

List of Figures

List of Tables
